

## INTEROFFICE CORRESPONDENCE

DATE: June 14, 1993

TO: R.L. Benedetti, Environmental Restoration, Building 080, X8540

FROM: J. G. Lehew, Environmental Restoration Project Engineering, Building 130, X5090 *JGL*

SUBJECT: OPERABLE UNIT 16 ADMINISTRATIVE RECORD DOCUMENTS FROM ENGINEERING & TECHNOLOGY - JGL-027-93

Ref: R.L. Benedetti ltr, RLB-268-93, to Distribution, Preparation for the Record of Decision (ROD) for Operable Unit (OU) No. 16, Low Priority, June 7, 1993

### PURPOSE

The purpose of this memorandum is to respond to the referenced memo.

### DISCUSSION

A review of Engineering & Technology (E&T) documents was conducted on June 11 and June 14 to identify any documents relative to the Administrative Record (AR) for Operable Unit (OU) 16.

A search was conducted in the Engineering Document Control Center for documents relative to OU16 with the following results:

- Engineering drawing 039115-001, issue A, titled Suspected Elevated Contaminant Sites identifies Individual Hazardous Substance Site (IHSS) locations on plant site relative to OU16 and may be pertinent to the AR for OU16.
- Attachment 1 identifies engineering drawings related to the design of the water treatment plant and may be applicable to IHSS 196, water treatment backwash pond.
- A review was conducted of the engineering drawings associated with the Resource Conservation and Recovery Act (RCRA) part B Permit. An initial review of the Engineering Drawing System Search Report (Attachment 2) does not specifically indicate any relevance to OU16, however, it is recommended that the AR staff review the attached report for association between the RCRA part B Permit and the OU16 AR requirements under the Comprehensive Environmental Response, Compensation and Liability Act.

All of these documents are located in the Engineering Document Control Center.

Additionally, not all of the RCRA part B Permit drawings have been transferred to E & T. This documentation would still be in the control of RCRA Regulatory Programs.

The referenced letter was also circulated to the E&T Directors for review. This review has not identified any additional documentation related to OU16 to date.
